

Pallot's Marriage Index for England: 1780 - 1837 for Derbyshire

Description:

Pallot's Index to Marriages covers all but two of the 103 parishes in the old City of London, England. Information available includes: spouses names, marriage date and parish of marriage. The dates span the time from 1780 to the onset of General Registration in 1837. The more than 1.5 million marriage entries come mainly from London and Middlesex, but also include entries from 2500 parishes in 38 counties outside of London-many not available in other sources. Also included are several records from counties in Wales.
